

TURKISH FORENSIC MENTAL HEALTH EXEMPLAR BAKIRKÖY, TURKEY

Forensic Mental Health Exemplar

Medical Architecture has partnered with local architects, providing specialist mental health care design support, to work up a series of exemplar designs in preparation for a roll out of new mental healthcare facilities across Turkey.

In their drive to replace old facilities, the Ministry of Health is keen to ensure that the new developments embrace the latest thinking on therapeutic mental healthcare environments as well as address the varied climatic conditions across the different proposed sites.
